Bryan & his wife Susan visit Lindbergh landing site near Paris – a bold feat in aviation history.

POSITION STATEMENT

- * I believe in God and in both the Constitutions of the United States of America and of Wyoming, and will support and defend them, always!
- * I believe that there is an assault on core provisions of the United States Constitution, specifically the First, Second, Fourth and Tenth Amendments which must be addressed any time attempts are made to circumvent them.
- * I believe free-market capitalism is the best economic system to ensure individual liberty and creative freedom.
- * I believe the National Debt is a great threat to our nation and our way of life.
- * I believe in the Right to Life.
- * I believe that the education of our youth is best left to the parents, local government, and states.
- * I believe that no one in Washington has the right to tell us in Wyoming how to manage our water, air, wildlife, and other natural resources.

I believe in the people of Wyoming!

A Vote for Miller is a Vote for Wyoming's Future!

BOLD LEADERSHIP

"We need leaders in Washington who will begin to dismantle the machine that tears at the hearts and souls of Wyoming people and businesses," said first-time candidate Bryan E. Miller. **Cited in the Wyoming Tribune Eagle**

DEFENDING AGRICULTURE

"Our agricultural heritage, our diverse environment, and our rich energy resources are all critical to Wyoming's economy. We must protect our right to utilize those resources for Wyoming's residents today as well as for future generations." -- Bryan E. Miller

ENERGY AND ENVIRONMENT

"Wyoming's coal, oil, natural gas, and wind resources are key to national energy independence; clean coal technology will allow Wyoming new opportunities to both maintain our role as a core source of power for the nation as well as an essential U.S. based carbon fiber and rare earth minerals producer for manufacturing critical civil and military safety, medically vital, and energy related products." -- Bryan E. Miller
